NOTES

- 1) The carrier frequency is default. Increasing the carrier frequency requires a reduction in current.
- 2) The AC motor drive should operate in derating current when its control method is set to FOC Sensorless, TQC+PG, TQC sensorless, PM+PG, PM sensorless.
- 3) The rated input current will be affected not only by Power Transformer and the connection of the reactors on input side, but also fluctuates with the impedance of power side.
